

Business Only Broadband™ delivers true diversity with Wireless Metro Area Network (WiMAN) Solutions for the Financial Sector and Large Enterprise

Business Only Broadband™ (BOB) is the culmination of experience, technology and the recognized need to be able to provide true diversity from land line networks. First the Internet, and now Extranets, are mission-critical to today's business environment. Our management team has been at the forefront of innovative networking solutions for the last 25 years.

BOB is the next generation of last mile providers for Internet and data networking.

Network Feature

Customer Benefit

- | | |
|---|---|
| >> 100% Wireless. No common point of failure with landline based LEC or CLEC networks. | >> Customers stay connected in the event of a failure with their local LEC or CLEC. |
| >> The largest fixed-wireless broadband provider in Chicago, New York and New Jersey metro | >> More coverage means more availability and options to connect to your branch offices, vendors, financial exchanges, data providers and data centers. |
| >> Self-healing mesh architecture connecting transmission sites in each market | >> Data can travel faster over multiple routes , improving reliability, performance and security strategies. |
| >> The latest wireless & networking technology powered by Cisco, Motorola, Dragonwave, and BridgeWave | >> Customers get faster deployment and more choices to fit their needs as well as the latest encryption, security and routing technology available. |
| >> Redundant Data Centers (in Chicago, New York and New Jersey) and interconnection with multiple Tier 1 providers in each market | >> Increases network security , provides Internet transit diversity, gives customers more choices, and enhances performance metrics. |
| >> Scalable bandwidth on-demand | >> Customers increase bandwidth to fit their business requirements with one call avoiding additional installation costs and time. |
| >> Bandwidth from 1 Mbps to 1 Gbps | >> More Choice. More Bandwidth Options. |
| >> Primary and Business Continuity Solutions | >> Custom Solutions. Carrier-Class SLAs with 99.995% availability , low latency and packet loss |
| >> 24/7/365 NOC and network monitoring | >> If you experience a service issue call day or night. Our technicians are watching even when you are not. |
| >> Secure MPLS architecture with Layer 2 and Layer 3 services | >> Seamlessly connect to all remote (LANs) offices and routed networks. |
